

## Pryv partners with Net4all to launch a managed hosting solution for privacy and personal data management

Secure hosted solution enables innovation and accelerates time to GDPR compliance for Swiss startups and SMEs

**Lausanne, June 26th, 2018** – Pryv, the leading provider of privacy and personal data management software, today announced a partnership with [Net4all](#) which will give Swiss startups and SMEs access to a secure, compliant and fully managed cloud hosting solution for [Pryv.io](#). This partnership will ensure that sensitive personal data is duly managed thru its lifecycle and kept completely secure under the stringent standards of the [Swiss LDP](#) and [GDPR legislation](#). Net4All, one of the top hosting providers in Switzerland, is specialized in Web Hosting, Managed Services and Cyber Security for information systems and digital platforms. The company is ISO 27001 compliant.

“With [Pryv.io](#) on a managed cloud, customers get up and running quickly, with enterprise class operational support and proactive monitoring” says Anthony Gerard, CEO at Net4all.  
“This way, in-house SME teams can focus on innovation and getting out to market quickly while Pryv and Net4all deliver core privacy functionalities as a service”

Managing privacy can be a costly capital expense that requires skilled resources to operate and maintain business applications in a secure and reliable manner. By hosting [Pryv.io](#) within Net4all world-class data centers and leveraging their expert management services, startups and SMEs gets the best of both worlds – rigorous privacy preserving capability at reduced operational costs, greater performance and reliability.

“Today, we are seeing more than three-quarters of startup customers ask about managed cloud hosting” says Pierre-Mikael Legris, CEO at Pryv. "As that deployment model becomes the norm, we are now ready to enable our customers to move to the cloud with confidence, fast, and leveraging the highest standards of reliability, security, and scalability."

Through this trusted partnership, hosted customers receive the following benefits:

- A secure hosted environment that best suits their needs, with 24/7/365 support
- Full ownership of the data and retention of the software rights
- Custom tailored backup and data retention policy
- Ability to customize their application and still remain in the cloud
- Receive software updates and services packs at no additional charge.

Net4all and Pryv will offer four managed hosting packages with varied levels of support, beginning from a “**get started**” offering for **POCs at 185 CHF / month** to a premium Platinum Package for large scale, mission critical environments. The Pryv and Net4all team will sit down with you for consultation to assess your needs and the level of support needed.
